

# AT@Work

*AT@Work is a Dutch network of professionals from the government, academia, NGOs and the private sector interested in the large-scale market introduction of appropriate water and sanitation technologies.*

*Overall objective of the network is to help reduce the proportion of people without access to safe drinking water and sanitation, in accordance with the Millennium Development Goals.*

**Specifically, AT@Work aims to achieve this by:**

- Initiating, structuring and supporting demonstration projects
- Transferring knowledge on all aspects of the market introduction of appropriate water and sanitation technologies
- Providing a framework for developing and testing (potential) technologies and to determine their viability and suitability in a certain context
- Providing tools that enable users to improve on the development and implementation of technologies
- Encouraging the so-called supply chain (the developers, manufacturers, distributors and outlet keepers) to get involved in appropriate technologies

PARTICIPANTS:	
Acacia Institute	Ecological Management Foundation (EMF)
AIDEnvironment	IBOTA Foundation
Aqua-Aero WaterSystems BV	IRC - International Water and Sanitation Centre
Aquaatis	Norit Process Technology B.V.
AquaEst International	Practica Foundation
Aqua for All	SNS Asset Management
ARRAKIS	Solar Dew
Basic Water Needs Foundation	TNO Scheidingstechnologie
Clean Water Now! BV	WASTE
Dutch Rainmaker	Zonnewater b.v.

All organizations or people interested in Appropriate Technologies are invited to visit our website and can contact us at:
